Avast Business Managed Security Solutions

Cloud-based, layered cybersecurity services from a single console.

Deliver advanced protection from one of the largest, most trusted names in cybersecurity quickly and easily from an intuitive security platform. The result is enterprise-grade cybersecurity and complete control across your entire security ecosystem without the cost or complexity.

Stay ahead of cyberthreats and keep operations secure.

By the time a cyberattack has penetrated a company's network, it may be impossible to repair the infected systems and devices. With the threat of cybercrime and new security vulnerabilities, businesses need the tools and insights to easily identify anomalies and mitigate threats before they can damage networks.

Managed security services provide the answer. By combining the right layers of security services and features in an intuitive delivery platform, Avast Business Managed Security Solutions help businesses easily secure network weak points, manage complex environments, and monitor any anomalies.

LAYERED PROTECTION

Get ahead of evolving threats with advanced, layered endpoint and network security services. Our award-winning antivirus solutions and innovative technology raise the bar against zero-day threats. Complement your antivirus protection with integrated security services, including secure web gateway, content filtering, email encryption, antispam, patch management, backup and recovery, and more.

DEEP INTEGRATION

Eliminate your point solutions and security gaps with comprehensive services that work in unison to protect businesses from any cyberthreat. With our integrated managed security solutions, you can deliver remote support, set and enforce security policies, schedule and automatically deploy patch management, and more – for a complete defense.

COMPLETE VISIBILITY

At-a-glance dashboards allow you to choose from a range of features to gain complete visibility. Use real-time monitoring and alerting for a 360-degree view of any environment you manage. Quickly adjust security levels as events and threats evolve. Evolve and resolve issues from a single, cloud-based platform.

Choose the right managed security services platform for your business.
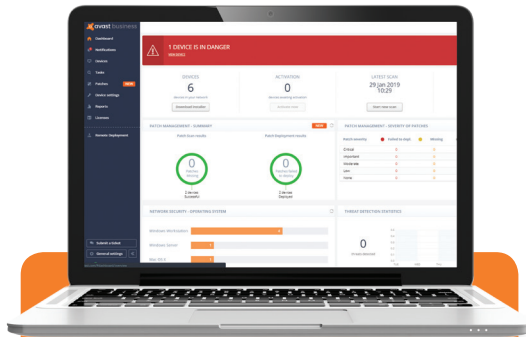

Avast Business
Management Console

- **User-friendly Interface**
- **Basic Reporting**
- **Policy Management**
- **Remote Deployment**

Ideal for small businesses that need an easy-to-use cloud or on-premise platform to quickly deploy antivirus to multiple endpoints, provide continuous monitoring, and get the insight needed to deliver superior protection.
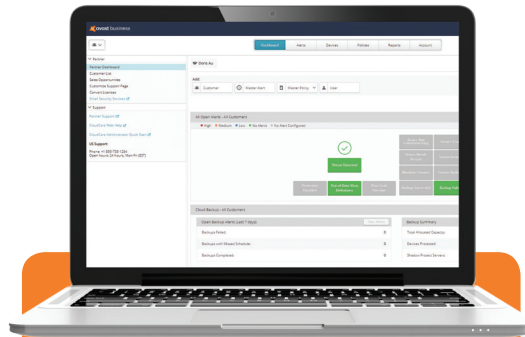

Avast Business
CloudCare

- **Centralized Dashboard**
- **Detailed Reporting**
- **Remote IT Support**
- **Third-party Integrations**

Ideal for small to medium businesses and IT service providers that want to mix and match endpoint and network security services, monitor threats, and resolve issues from one cloud platform.
